YG Critical Care Unit Invasive Procedure: Percutaneous Tracheostomy

Procedure date/time:	
Bedside assistant:	
Supervised? (Name/grade):	

Completion of this form is a joint responsibility between operator and bedside nurse/assistant

Addressograph

Name

Hospital Number

Date of Birth

BEFORE THE PROCEDURE

Patient identity checked, Signed consent	☐
Contraindications checked (FiO_2 >0.4/PEEP>10; anatomical/vascular problem)	☐
Anticoagulants and coagulation checked	☐
Tracheostomy tube agreed with consultant	☐
Equipment available? (PTO for equipment list)	☐
Consider USS neck; Local Anaesthetic/adrenaline to site	☐
Consider Feed stopped and NG aspirated	☐
Consider Informing ENT:	☐
Name of Sx informed for backup:	

TIME OUT

Verbal confirmation with team before start of procedure

Team members introduced, roles assigned	☐
Position optimal	☐
Allergy status known	☐
Intubation grade known	☐
Monitoring functional including CO_2	☐
100% O_2; Vent settings adequate; cuff intact	☐
Adequate sedation; paralysis; extra NMBA	☐

Any concerns? **STOP**: GET HELP

ANTICIPATED DIFFICULT? CONSIDER THEATRE PROCEDURE

During the Procedure

OPERATOR(S): TRACHEOSTOMY		OPERATOR(S): BRONCHOSCOPY
Name & Grade:		Name & Grade:
Size & Type of tracheostomy:		Level of entry of tracheostomy: Sited at _____ring, at _____ O'clock.
Sterile gloves/gown worn	☐	
Large fenestrated drape	☐	Comments:
2 x chloraprep sticks to skin	☐	
Comments: (eg attempts)		

Complications (document in care record and submit Datix)

Unable to place ☐	Vascular Puncture ☐	Desat./Low BP ☐	Malposition ☐	Other ☐	None ☐

SIGN OUT

Position confirmed with bronchoscope: tip is _____cm from carina,	☐
Ventilator settings reviewed; capnography in situ	☐
Sedation reviewed; drugs (inc local anaesthetic) documented in medication chart	☐
Cuff Pressure recorded; _____mmHg	☐
Sharps disposed of	☐
Chest x-ray ordered and responsibility for review assigned to _____	☐
Adverse events (see above) documented in notes and Datix submitted (or N/A)	☐
