University of Liverpool
Departments of Anaesthesia and Immunology
Database for Suspected Anaphylaxis under General Anaesthesia

DATASHEET

Section 1: Patient Contact Details

Title *tick box* Mr. ☐ Ms. ☐ Miss ☐ Mrs. ☐

First name _____

Surname _____

Address _____

_____

names and addresses of patients will not be entered on the database; this information is required in order that we can contact the patient and invite them to attend for outpatient investigation.

Date of birth _____

Age _____ *at time of reaction*

Sex *tick box* M ☐ F ☐

Ethnic Origin *tick box*

White British ☐	Mixed White/Black Caribbean ☐	Indian ☐	Black Caribbean ☐
White Irish ☐	Mixed White/Black African ☐	Pakistani ☐	Black African ☐
Other White ☐	Mixed White/Black Asian ☐	Bangladeshi ☐	Other Black ☐
	Other mixed ☐	Other Asian ☐	Chinese ☐

NHS number *if known* _____

Hospital number _____

Referring anaesthetist : Name _____

Tel. no. _____

Email: _____ *If available*

Outcome *tick if fatal* ☐

Section 2: Patient Past Medical History

ASA grade (circle) 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 ☐

Previous cardiovascular disease _____

_____

_____

Previous respiratory disease _____

_____

_____

Other system disease _____

_____

Regular medications _____

_____

_____

Height (metres) _____

Weight (kg) _____

Previous anaesthesia history

Date				
Uneventful?	Y/N	Y/N	Y/N	Y/N
Drugs given				

Known allergies

Food _____

Drug _____

Latex ☐

Atopic history

Asthma ☐

Eczema ☐

Hayfever ☐

Section 3: Reaction Details

Date of reaction _____

Proposed operation _____

Suspected agent (if any) _____

Premedication drugs

Drug	Dose	Route	Time

Induction drugs and drugs given at induction

Drug	Dose	Route	Time

Maintenance drugs and drugs to reverse neuromuscular blockade

Drug	Dose	Route	Time

Drugs used to treat reaction

Drug	Dose	Route	Time

Fluids given in first hour after reaction onset

Crystalloid _____ (Litres) Colloid _____ (Litres)

Symptoms and onset time (leave blank if symptom did not occur)

Symptom/ Sign	Time of onset	Time resolved
Hypotension		
Tachycardia		
Bronchospasm		
Cyanosis/ desaturation		
Angioedema		
Urticaria		
Arrhythmia		
Other (specify)		

Severity of reaction *tick one*

- ☐ Cutaneous signs only
- ☐ Measurable signs *e.g. hypotension (fall >30%) tachycardia*
- ☐ Life-threatening *e.g.circulatory collapse or severe bronchospasm*
- ☐ Cardiac/ Respiratory arrest

Complications

- Mechanical ventilation required ☐
- Acute renal failure ☐
- Coma / other neurological outcome ☐
- Death ☐

Description of reaction *give any extra information you feel is important but which you have not already given*

_____

_____

_____

_____

_____

Section 4: Blood Sampling for Mast Cell Tryptase

Time and date of blood sample 1 _____

Time and date of blood sample 2 _____

Time and date of blood sample 3 _____
