COVID-19 In-Room RSI Checklist

Bold points to be read out loud during pre-oxygenation. All team members must participate.

Equipment

❑ **Drugs drawn and labelled?**

Induction Agents:

state doses: mg, mls

Muscle Relaxant:

state dose: mg, mls

Vasopressor

Maintenance Drugs

❑**Intubating equipment:**

CMAC on

Laryngoscope

ET Tubes

Bougie

Suction to hand

Water's with HME

❑**Ventilator ready**

❑**ETT clamp available**

❑**Check connections to avoid inadvertent disconnection**

Team (max 3)

❑ **Team leader & intubator**

❑**Intubation assistant**

Drugs

Adjusting APL

Cricoid (if required)

Patient

❑ **IV access**

500ml Hartmans running

❑ **Check monitoring:**

Capnography (CO_2)

Oxygen Saturations

ECG

BP – 2.5 minute intervals

❑ **Optimal position**

Ramped

Pillow

❑ **Pre-oxygenation**

No nasal cannula

No HFNO

2 hand FM with complete seal

Plan

❑ **Intubation plan**

Plan A – CMAC advised

Plan B – 2nd gen SGA

Plan C – FM, low flows, 2 person

Plan D – FONA, scalpel bougie advised

❑ **Principles**

No bagging until ETT cuff inflated unless critical

No chest auscultation

Clamp tube before disconnection

❑ **Everyone ready to proceed**

Proceed only if yes

This checklist is not intended to be a comprehensive guide to preparation for induction

DISCONNECT = CLAMP TUBE

COVID-19 Post RSI Checklist

Bold points to be read out loud post Intubation. All team members must participate.

Patient

❑ **$ETCO_2$ trace?**

❑**ETT Secure**

❑**Sedation running**

If delayed consider bolus of ketamine or midazolam

❑**Paralysed**

❑**Ventilator**

SIMV
TV 6ml/kg
PEEP 12
RR 24 I:E 1:1
Ppeak < 30cmH_20
O2 titrated to sats >90%

❑**Wipe gross contamination**

❑**Insert NG tube**

❑**Change outer gloves**

Equipment

❑ **Check Monitoring**

Capnography (CO_2)
Oxygen Saturations
ECG
BP 2.5 minute interval

❑**Airway equipment (***CMAC blade, waters circuit, facemask, etc).*

Place back in the tray and seal in the clear plastic bag. Keep with patient.

(Transfer)

❑ **Destination**

Call ahead

❑ **Drugs to take?**

Muscle Relaxant
Vasopressor
Maintenance Drugs

❑ **Equipment to take:**

Ventilator
Sufficient oxygen
Syringe driver
Portable suction
Portable monitor
Airway tray
Laryngoscope in bag

❑ **Route**

❑ **Outriders ready**

Final prep

❑ **Wipe all surfaces –**Trolley, vent, monitor, syringe driver

❑**PPE on until handed over**

❑ **Ready to proceed?**

❑**On Arrival:**

❑ **Clamp tube and pause vent before any disconnection**

❑ **Invasive lines to be placed on HDU / ITU (**prior to removing PPE)

❑**Document everything afterwards**

This checklist is not intended to be a comprehensive guide to patient care.
